481-33

CONTENTS OF VOLUME 122

NUMBER 1, MARCH 1984

F. Baldissera and D. Kernell, Introductory comments to the Symposium " Exctation-to-frequency transduction in mammalian neurones . . . . . *Page* 3

D. Kernell. The meaning of discharge rate: excitation-to-frequency transduction as studied in spinal motoneurones 5

B. Gustafsson. Afterpotentials and transduction properties in different types of central neurones 17

W. E. Crill and P. Schwindt. Ionic mechanisms underlying excitation-to-frequency transduction: studies by voltage clamp methods 31

F. Baldissera. Impulse frequency encoding of the dynamic aspects of excitation 43

A. Grantyn and R. Grantyn. Generation of grouped discharges by tectal projection cells 59

H. Jahnsen and R. Llinás. Voltage-dependent burst-to-tonic switching of thalamic cell activity: an *in vitro* study 73

NUMBER 2, JUNE 1984

E. Mugnaini, F. G. Wouterlood, A.-L. Dahl and W. H. Oertel. Immunocytothemical identification of GABAergic neurons in the main olfactory bulb of the rat 83

C. Ambrogi Lorenzini, C. Bucherelli and A. Giachetti. Arbitrary time unit counts as a mean to evaluate animal activities 115

M. Favilla, B. Ghelarducci and A. La Noce. Recovery of the vertical vestibulo-ocular reflex gain in rabbits submitted to bilateral and unilateral visual deprivation from birth 121

Y. Gahéry, O. Pompeiano and M. Coulmance. Changes in posturo-kinetic limb responses to cortical stimulation following unilateral neck deafferentation in the cat 129

K. KAWAMURA and S. ONODERA. Olivary projections from the pretectal region in the cat studied with horseradish peroxidase and tritiated amino acids axonal transport . . . . . *Page* 155

NUMBER 3, SEPTEMBER 1984

K. K. OSEN, E. MUGNAINI, A.-L. DAHL and A. H. CHRISTIANSEN. Histochemical localization of acetylcholinesterase in the cochlear and superior olivary nuclei. A reappraisal with emphasis on the cochlear granule cell system 169

A. P. MONACO, H. A. BAGHDOYAN, J. P. NELSON and J. A. HOBSON. Cortical wave amplitude and eye movement direction are correlated in REM sleep but not in waking 213

E. MOTLES and M. GONZÁLEZ. Motor effects of electrical and cholinergic stimulation of the cat's dorsal hippocampus 225

B. BLUM. Specific and non-specific inhibition induced by LP-pulvinar inputs to area 7 of the rhesus monkey 237

REVIEW ARTICLE

G. RECORDATI. The functional role of the visceral nervous system. A critical evaluation of Cannon's " homeostatic " and " emergency " theories 249

NUMBER 4, DECEMBER 1984

M. KEMALI and V. GUGLIELMOTTI. The distribution of substance P in the habenulo-interpeduncular system of the frog shown by an immuno-histochemical method 269

T. YAMAUCHI, S. E. NEWMAN and C. AIMONE-MARSAN. Experimental studies on different thresholds for epileptiform activity 281

M. G. MAIOLI, C. GALLETTI, S. SQUATRITO, P. P. BATTAGLINI and E. RIVA SANSEVERINO. Projections from the cortex of the superior temporal sulcus to the dorsal lateral geniculate and pregeniculate nuclei in the macaque monkey 301

H. SAKIYA, K. KAWAMURA and S. ISHIKAWA. Projections from the Edinger-Westphal complex of monkeys as studied by means of retrograde axonal transport of horseradish peroxidase 311
